

# PRODUCT: Index + Block

# PSF ENERGY

Index Plus Block products are designed for customers who are willing to accept more risk for a lower price and want the flexibility that comes with taking an active role in managing your energy costs. You are savvy about the electricity market, willing to spend the time and effort to make ongoing decisions about when and how much to buy, and comfortable with more risk.

You decide when to fix the price for a fixed volume of usage; any usage above the fixed volume will be at the market price. We provide price information so you can decide when to purchase, and we analyze your historical and forecasted consumption to help you determine how much to purchase.

## OPTIONS:

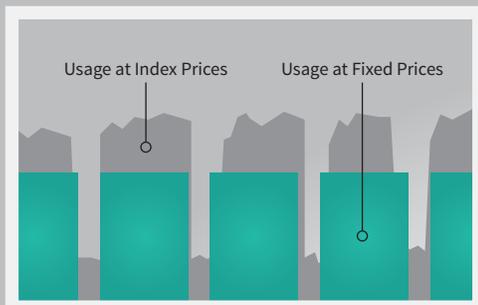

- Default energy price is the market price. Choose Day Ahead or Real Time indices (availability depends on provider).
- Fix the price for fixed volumes of electricity (blocks) for any number of calendar months during the term of the contract. Purchase blocks for standard periods (7x24, peak, off-peak, etc.).

## OPTIONS (CONT.):

- Ancillaries, capacity and transmission can be fixed or passed through, depending on the wholesale market. If fixed, they are included in your contract price.
- Purchase renewable energy certificates to green a percentage of your usage.

## BENEFITS:

- **Flexibility** – Change how much usage is at a Xfixed price.
- **Market Events** – Make purchases when market events present buying opportunities. when your usage varies from events beyond your control, such as a long summer heat wave.
- **Lower Price** – Avoid the additional cost for usage variance protection (you take the risk of market prices for usage not covered by a fixed price block).

Market prices are volatile; they can change by a lot, quickly. With Flexible Index Solutions, you lock in your prices when you want to so you can take advantage of market price changes.

With Index Plus Block, each fixed price covers a fixed volume of electricity. You decide how much of your usage will be at fixed prices; the difference between your usage and your fixed volumes will be charged market index prices.
